## THE EXPERT CONSENSUS PANEL FOR BEHAVIORAL EMERGENCIES 2005

The following participants in the Expert Consensus Survey were identified from several sources: members of the American Association of Emergency Psychiatry, individuals who have published research on emergency psychiatry or psychopharmacology, and emergency physicians who are recognized for their contributions to the treatment of patients with mental illness in general emergency settings. Of the 50 experts to whom we sent the behavioral emergencies survey, 48 (96%) replied. The recommendations in the guidelines reflect the aggregate opinions of the experts and do not necessarily reflect the opinion of each individual on each question.
