

Volume 20, Supplement 1 December 2005

20th Anniversary Year

Journal of Child Neurology

Treatment of Pediatric Epilepsy:
Expert Opinion, 2005

GUEST EDITORS

James W. Wheless, MD; Dave F. Clarke, MD;
Daniel Carpenter, PhD

- S1 Abstract
- S2 Expert Consensus Panel
- S3 Introduction
- S4 Methods
- S6 Overview of Results
- S9 Symptomatic Myoclonic and Generalized Tonic-Clonic Seizures
- S16 Complex Partial Seizures
- S22 Neonatal Seizures
- S25 Infantile Spasms
- S29 Lennox-Gastaut Syndrome
- S34 Febrile Seizures
- S36 Benign Childhood Epilepsy with Centro-temporal Spikes
- S37 Absence Epilepsy
- S42 Juvenile Myoclonic Epilepsy
- S44 Newly Diagnosed Epilepsy in the Emergency Department
- S46 Status Epilepticus
- S50 Discussion
- S52 References
- S57 CME Evaluation and Posttest

Editing and Design. Ruth Ross, M.A., and David Ross, M.A., M.C.E., Ross Editorial

Acknowledgments. The authors thank all of the experts who completed the survey so carefully and acknowledge Paola Vega, of Expert Knowledge Systems, for managing the data collection.

Reprints. Reprints may be obtained by sending requests with a shipping/handling fee of \$19.95 per copy to: Comprehensive NeuroScience, Inc., 21 Bloomingdale Road, White Plains, NY 10605. For pricing on bulk orders of 50 copies or more, please call Expert Knowledge Systems at (914) 997-4005. For more information on the Expert Consensus Guidelines or to order by credit card, visit www.psychguides.com.

Disclaimer. The opinions expressed herein are those of the authors or represent a compilation of survey participant data. They do not necessarily reflect the views of the CME provider and are not attributable to grant sponsors or to the publisher, editor, or editorial board of *Journal of Child Neurology*.

Guidelines and consensus documents such as this can provide only general suggestions for clinical practice; practitioners must use their own clinical judgment in treating and addressing the needs of each individual patient, taking into account that patient's unique clinical situation. There is no representation of the appropriateness or validity of the information, including treatment recommendations, in this consensus document for any given patient. The developers of this consensus document disclaim all liability and cannot be held responsible for any problems that may arise from its use.

EXPERT CONSENSUS PANEL

The following participants in the Expert Consensus Survey were selected based on recent publications and national recognition and represent a geographic cross section of the United States. Of the 41 experts to whom we sent the epilepsy survey, 39 (95%) replied. The recommendations in this publication reflect the aggregate opinions of the experts and do not necessarily reflect the opinion of each individual on each question.
